# WHY SHOULD YOU NICHE DOWN?

One of the benefits of focusing on one design niche is that you will be more productive and profitable.

As a web designer, you should focus on just a few niches and learn how to harness the full potentials in those niches.

A web designer's two main goals are to stand out from competitors and also maintain a full schedule filled with cash.

Taking the right steps to ensure the sustainability of your services will go a long way toward helping you achieve your goals.

One such decision is selecting the right niche for your web design business.

Oftentimes, specialization seems contradictory.

Your aim is to expand your client base, and narrowing your scope might seem contrary to that objective.

Nevertheless, by focusing on one niche, you can improve productivity and profitability.

There are 28 high paying web design niches listed in this handbook which you can check out and start getting high paying clients with immediately.

Having said that, these are the high paying web design niches that will pay you extremely well...
